Subject: Humfrey Industrial Repairs - Precision Machine Works Millwright Services and Customer Fabrications

Good afternoon guys,

I just wanted to let you know that for the Calgary Stampede Project, EHV Utilities subbed the services of Humfrey Industrial Repairs to do machining work necessary to meet critical timelines on the project. EHV has reported back to me that Humfrey Industrial Repairs were prompt in their response and contributed to the overall success of the project.

I've cc'ed Peter Shkuratoff from Humfreys on this email, and I think it would be worthwhile to have these guys become approved contractors to do work for Enmax. Can you please direct Humfreys how to get contractor pre-approval.

Cheers,

Senior Engineer, Integrated Projects
